## Overview

---

What types of solar lighting solutions do you offer?

We offer many solar lighting system solutions including solar street lights, solar sign lights, solar bus shelter lights, solar security lights, solar parking lot lights, solar flag pole lights, as well as others.

What is solar powered LED lighting?

Solar Powered LED lighting is a great way to light up your home or business without using any electricity. Solar lights work by absorbing sunlight during the day and then using that energy to power the light at night. Solar powered lights are very popular because they are environmentally friendly and they can save you money on your electric bill.

Should you buy a commercial solar light?

One-size-fits-all solar lights can be a useful option for some applications, but if you want a solar light that performs reliably year-round, rain or shine, then you'll want a heavy-duty commercial solar-powered light. When you purchase a system from us, if you desire dusk to dawn illumination, that means dusk to dawn.

How do solar powered lights work?

Solar lights work by absorbing sunlight during the day and then using that energy to power the light at night. Solar powered lights are very popular because they are environmentally friendly and they can save you money on your electric bill. Solar lights are available in a variety of styles, so you can find the perfect lights for your needs.

Are solar powered lighting systems a win-win option?

At a time where there is continuing pressure for companies and organizations to go green and be more environmentally friendly, a solar powered lighting system is a win-win option. Solar Illuminations offers a large selection of

commercial solar-powered lighting systems.
