800MW solar power station

Overview

Where is Qatar's first solar power plant?

Qatar's first solar power plant, built by Chinese companies, was put into operation on Tuesday, marking a milestone for the country in energy transition. The 800MW Al Kharsaah Solar Power Plant, located in the desert area about 80 kilometers west of its capital Doha, is one of the largest in the Middle East.

What is Qatar's first large-scale solar power generation project?

This Marubeni investment-backed plant, which was inaugurated on October 18, is the first large-scale solar power generation project in Qatar, with a maximum output of 800 MW. The power generated will be sold to Qatar's General Electricity & Water Corporation Kahramaa under a long-term contract of 25 years.

How many solar radiation monitoring stations are there in Qatar?

QEERI, a national research institute under Hamad Bin Khalifa University in Qatar, has 14 solar radiation monitoring stations at various locations in Qatar, including Al Kharsaah, to record the various components of solar radiation. Do you have interesting content to share with us?

.

Which region is best suited for solar power generation?

The Middle East is the most suitable place for solar power generation, meeting the two key conditions for this form of energy production: an excellent amount of solar radiation and a vast available land area for equipment installation.
