About solar panels France

Overview

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW. However, a proposal to reduce solar PV subsidies for ongoing projects until 2030 has created controversy, affecting the sector's growth.

The French solar market grew by around 30% in 2023, reaching 3.15 GW, according to new data from Enedis. PV systems for self-consumption accounted for around one-third of all new capacity additions.

The French solar market grew by around 30% in 2023, reaching 3.15 GW, according to new data from Enedis. PV systems for self-consumption accounted for around one-third of all new capacity additions.

Photovoltaic solar technology can produce clean electricity without emitting any greenhouse gases. It contributes to the development of renewable energy solutions in the French energy mix. Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

How many solar panels are installed in France?

Solar panel installations are increasing in France with the last year seeing over 200,000 installations across the country as prices fell. This includes installations from both professionals and from DIY kits, which allow homeowners to set up the panels by themselves. Read more: Why record numbers of homeowners in France are installing solar panels.

How much does it cost to install solar panels in France?

However, as a rule of thumb, the French energy management agency 'ADEME'

considers the cost to be €3,000 to €4,500 per kilowatt of power created. As most domestic installations generate around 3k/W of power, this means the cost of the panels themselves is €9,000 to €13,000. For 6 k/W of power expect to pay €16,000 to €19,000.

Does France have a solar energy sector?

The exponential growth of the solar photovoltaic energy sector in France has never stopped since its inception in the early 2000s. In 2022, the PV energy capacity in France amounted to approximately 17 gigawatts, making France the fifth European country for cumulative PV capacity that year.

Are there tax credits for solar panels in France?

Since 1st January 2014 there are no longer any tax credits available for the installation of photovoltaic solar panels. Nevertheless, in France, as in many other countries, there are incentives in place for property owners to sell electricity back into the grid at preferential prices.

Can you have solar panels on a property in France?

Other rules may apply if your property in France is located in certain historic areas. Read more: [Can you have solar panels on homes in historic areas of France?](#)

You will also need to contact Consuel for an Attestation de Conformité to confirm your installation is safe to be connected to the main power grid, which costs €180.
