Acquisition of solar power plants

Overview

In 2017, T-Solar acquired two operating Concentrated Solar Power (CSP) plants in Spain with a combined installed capacity of 100 MW: the Moron plant in Seville and the Olivenza plant in Badajoz. Since beginning their operations in 2012, the two plants have delivered more than 200 GW per year to the grid, meeting the annual needs of around .

In 2017, T-Solar acquired two operating Concentrated Solar Power (CSP) plants in Spain with a combined installed capacity of 100 MW: the Moron plant in Seville and the Olivenza plant in Badajoz. Since beginning their operations in 2012, the two plants have delivered more than 200 GW per year to the grid, meeting the annual needs of around .

The facility will be acquired pursuant to a build-transfer agreement with EDF Renewables, a company with a longstanding track record of developing and building renewable energy facilities. Known as the Huck Finn Solar Project, it is planned to be constructed on the border of Missouri's Audrain and Ralls counties.

Paris/Austin, April 27, 2022 – TotalEnergies is further expanding its presence in the U.S. renewable energy industry by acquiring Austin-based Core Solar, LLC whose portfolio includes more than 4 GW of utility-scale solar and energy storage projects at various stages of development across several U.S. states and power markets.

RENO, Nev., Oct. 23, 2023 (GLOBE NEWSWIRE) -- Ormat Technologies, Inc. (NYSE: ORA), a leading renewable energy company, announced today that it has entered into a purchase agreement with Enel Green Power North America (EGPNA), a subsidiary of Enel SpA (ENEL.MI), to acquire a 150 MW portfolio, which includes two contracted operating geothermal .

The acquisition accelerates the mass deployment of clean energy technologies through virtual power plant enablement and new financing opportunities available to solar companies on the east coast.
