# Adden energy battery Moldova

## Adden energy battery Moldova

---

### Battery Engineer

Adden Energy is developing solid-state batteries for automotive and consumer applications and is located in the Boston Area. Our technology is based on leading research from Harvard University and our team is backed by prominent venture capital investors. We are looking for a Battery Engineer to jo

### About -- Adden Energy

Adden Energy, founded by a team of scientists at Harvard University, is developing and scaling up a brand-new type of solid-state battery. With demonstrated charge times as low as 3 minutes and capacity retention for over 10,000 cycles in a lab-scale cell, Adden Energy is developing cutting edge technologies to enable mass adoption of EVs

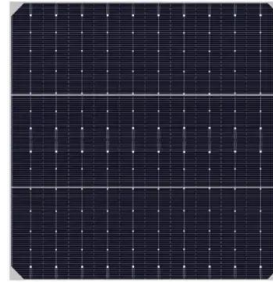

### Adden Energy

Adden Energy , LinkedIn ??? 2,277? , A Harvard University spin-off commercializing novel solid-state battery technology , The problems posed by climate change need no introduction - it is one of the most pressing challenges of our era. Rapid development of clean energy storage technology is critical to combating this plague. In fact, electrification of the world's vehicle fleet

## Revolutionizing Energy Storage: Harvard's Solid State

## Lithium Battery ...

The technology, licensed to Adden Energy, a Harvard spinoff company co-founded by Li and three Harvard alumni, has already scaled up to build a smartphone-sized pouch cell battery. Retaining 80% of its capacity after an impressive 6,000 cycles, this innovation showcases promising potential for commercial viability.

## Harvard's 10-min charging solid-state EV battery gets funding boost

Harvard's 6,000-cycle EV battery that charges in 10 minutes gets funding boost. Adden Energy has developed a self-healing separator that prevents harmful dendrite growth, allowing their lithium

## US-based startup Adden Energy innovate EV battery ...

US-based startup Adden Energy has announced that it has accomplished solid-state battery charge rates as fast as three minutes with over 10,000 cycles in a lifetime in lab settings. The startup has now been granted a ...

## Adden Energy Announces World's Fastest Lithium Metal Battery ...

Adden Energy Announces World's Fastest Lithium Metal Battery Has Achieved Breakthrough Low Temperature Performance. Adden Energy, a leading developer of solid-state batteries, announces that its record-breaking lithium metal

batteries can now maintain extreme-fast-charging (EFC) of less than 10 minutes at room temperature.

## Solid state battery startup Adden Energy collects \$15M

Battery startup Adden Energy has closed a \$15 million Series A round to build a pilot production line for its solid-state batteries. Why it matters: So-called solid-state batteries can charge more quickly and have a longer ...

## Adden Energy developed a coin-cell battery that charges in three

(Image Credit: Adden Energy) Harvard researchers developed a new coin-cell battery prototype that achieves a full charge in just three minutes with over 10,000-lifetime cycles. The team's startup, Adden Energy, received a \$5.15 million seed round of funding and an exclusive technological license from Harvard University to up-scale the

## Is Adden Energy the Next Big Energy Stock?

Adden Energy was founded in 2021 by a team of Harvard scientists, alumni, and venture capitalists, led by Professor Xin Li. In 2015, doctoral students William Fitzhugh and Luhan Ye

began the initial research and development on solid-state batteries at Li's group at Harvard's John A. Paulson School of Engineering and Applied Sciences.

## **Adden Energy Secures \$15M to Advance EV Batteries**

Adden Energy has raised \$15 million in Series A funding, led by At One Ventures, to scale production of its self-healing solid-state batteries. This funding will enable the company to expand its battery technology, which aims to overcome key barriers to electric vehicle (EV) adoption --including range, charge rate, battery lifetime, and safety .

## **Adden Energy hiring Senior Solid-State Battery Scientist in**

...

Adden Energy is developing sulfide solid-state batteries for automotive and consumer applications and is located in the Boston Area. Our technology is based on leading research from Harvard

## **Adden Energy Raises \$15M to Expand Accessibility of Electric**

...

Adden Energy has developed lithium-metal solid-state battery technology that solves these issues. To scale production and bring this

technology to car manufacturers, the company has raised \$15M in

## Adden Energy launches with technology license from Harvard to ...

Adden Energy, Inc. - a startup developing innovative solid-state battery systems for use in future electric vehicles (EVs) that would fully charge in minutes - has announced the grant of an exclusive technology license by Harvard University's Office of Technology Development (OTD) and a seed round financing of \$5.15 million. Primavera Capital Group led ...

## Adden Energy developed a coin-cell battery that ...

(Image Credit: Adden Energy) Harvard researchers developed a new coin-cell battery prototype that achieves a full charge in just three minutes with over 10,000-lifetime cycles. The team's startup, Adden Energy, received ...

## Harvard Spinoff Lobs Solid State Battery Bomb At Fossil Fuels

Adden Energy is one among many solid state battery innovators to overcome the ion

movement hurdle, and they have also come up with a vigorous solution to the problem of dendrite formation, to boot

2MW / 5MWh  
Customizable

## Solid state battery startup Adden Energy collects \$15M

Battery startup Adden Energy has closed a \$15 million Series A round to build a pilot production line for its solid-state batteries. Why it matters: So-called solid-state batteries can charge more quickly and have a longer range, which could help expand the market for EVs.

## Fast charging over 10,000 cycles: For future electric vehicles,...

Cambridge, Mass. -- September 1, 2022 -- Harvard's Office of Technology Development has granted an exclusive technology license to Adden Energy, Inc., a startup developing innovative solid-state battery systems for use in future electric vehicles (EVs) that would fully charge in minutes. Adden Energy has closed a seed round with \$5.15M in funding led by Primavera ...
