Albania stora energy

Overview

What is Albania's energy sector strategy?

In 2018, Albania adopted its National Energy Sector Strategy, which examined various energy development scenarios and set forth a series of key indicators and objectives that will shape Albanian's energy sector over the period from 2018 to 2030 (Table 2). Most notably, the strategy stipulated a 42% share of renewable energy in the TPES by 2030.

What type of energy is used in Albania?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Albania: How much of the country's energy comes from nuclear power?

.

What is Albania's energy mix?

Hydropower accounts for the largest share of the country's electricity generation, representing around 95% of the Albania's installed power capacity. This means Albania's energy mix has one of the highest shares of renewable energy in South East Europe; however, it is also highly dependent on annual rainfall.

Is biomass a source of electricity in Albania?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Albania: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Should Albania's energy mix include more renewables?

While Albania's energy mix already features one of the highest shares of renewables in the region owing to its extensive installed hydropower capacity, the essential need remains for a more secure, cost-competitive national energy supply. Diversifying the electricity mix to include more renewables would strengthen Albania's energy security.

Which sector consumes the most energy in Albania?

The largest energy consumer in Albania is the transport sector, whose share has almost quadrupled since 1990 and amounted to 40% of final energy consumption in 2018. The residential sector was the second largest (24%, 490 ktoe), followed by the industrial sector (20%, 418 ktoe) (EUROSTAT, 2019a) (INSTAT, 2020a).

Albania stora energy

KESH to Add Pumps for Energy Storage

Albanian state-owned power utility KESH is discussing a pumped storage hydropower project with the EBRD. Pumps would be added between the Fierza and Koman reservoirs. The system would be used for transporting water uphill when electricity demand is lower and release it through turbines when needed.
