

European Solar and Energy Storage Solutions

Armenia auxilium energy

Overview

How does Armenia generate electricity?

Most of the rest of Armenia's electricity is generated by the natural gas-fired thermal power plants in Yerevan (completed in 2010) and Hrazdan. Upon gaining independence, Armenia signed the European Energy Charter in December 1991, the charter is now known as the Energy Charter Treaty which promotes integration of global energy markets.

How much energy does Armenia need?

It has been an observer to the Energy Community since 2011 and a member of the Eastern Partnership since 2009. Although Armenia's energy demand averages more than 3 Mtoe (3.59 Mtoe in 2020) and the country does not produce any fossil fuels, it manages to cover 27% of energy demand with domestic energy production.

Why does Armenia need a single energy supplier?

Armenia relies on imports of natural gas and oil for most of its energy needs, which exposes it to supply risks and dependence on a single supplier. As the government considers energy security and the development of indigenous sources to be of prime importance for the energy sector, renewables and efficiency measures are key areas.

Does Armenia have a surplus electricity sector?

The Armenian electrical energy sector has had a surplus capacity ever since emerging from a severe post-Soviet crisis in the mid-1990s, thanks to the reopening of the Metsamor Nuclear Power Plant, which was built in 1979 and supplies over 40% of the country's electricity.

What is the energy mix in Armenia?

solar 0.68 plants (5.7%). Although Armenia's energy mix is dominated by gas, the electricity mix is well diversified in compar OTAL FINAL EN rgyconsumpt

portmethodology. Residential The households are the main and largest final consumers of energy (34.7%), includi.

How much solar power will Armenia have in 2024?

The government expects solar PV capacity to reach 100 MW by 2024 and 1,000 MW by 2030. According to the Ministry of Territorial Administration and Infrastructure, which oversees the energy sector, wind energy potential in Armenia is approximately 450 MW of total installed capacity.

Armenia auxilium energy

Armenian-EU Energy Cooperation

Fully understanding the critical role that the Metsamor NPP plays in Armenia's current energy infrastructure, EU had hoped to reduce that dependence through diversifying Armenia's sources of energy, including renewable sources.

Energy in Armenia

Armenia is also a partner country of the EU INOGATE energy programme, which has four key topics: enhancing energy security, convergence of member state energy markets on the basis of EU internal energy market principles, supporting sustainable energy development, and attracting investment for energy projects of common and regional interest. [7]
