Australia sodium batteries

QUT researchers deploy Australia's first sodium-sulfur

...

QUT researchers as part of the National Battery Testing Centre (NBTC) project have deployed Australia's first large-scale sodium-sulfur battery (NaS battery) at IGO's Nova nickel-copper-cobalt mine site, southeast of Kalgoorlie in Western ...

10kwh Sodium Ion Battery

The 10kWh Sodium-Ion Battery offers long-lasting, reliable energy storage, ideal for those seeking safety, sustainability, and scalability. Paired with the Victron Multiplus II, this combination delivers unmatched performance and efficiency.

New sodium-ion developments from CATL, BYD, Huawei

In the meantime, CATL's rival BYD said that its sodium-ion batteries have made progress in reducing cost and are already on track to be on par with lithium iron phosphate battery cost next year and even 70% less in the long run. The Chinese battery maker broke ground on a 30 GWh sodium-ion battery factory earlier this year.

What's New in EV Battery Technology for 2024

Innovative Tech Challenges Lithium-Ion in Australia's Energy Storage; Varta Leads Research in Eco-friendly Sodium-Ion Batteries; Sodium's abundance makes these batteries more sustainable and cost-effective. By reducing the cost of EV batteries, sodium-ion technology seeks to make electric vehicles more accessible to a broader audience.

Sodium-ion batteries

Sodium-ion batteries are proving to be a promising alternative to lithium-ion batteries - one that is cheaper, safer and easier to recycle. This next generation battery technology has the potential to power many things from an e-scooter to a grid-scale power station.

The Sodium Ion Battery is here

The demand for Sodium Ion batteries will be very high, and although CATL has designed the battery to be able to be manufactured with the majority of the same machines and factory lines, it will still take a number of years for other ...

Australian manufacturer reveals 1 MWh sodium chloride battery ...

Altech Batteries, a battery tech company in Western Australia, has included "game-changing" sodium chloride technology in its new battery 1 MWh GridPack. It said it expects the new systems to be

QUT researchers deploy Australia's first sodium-sulfur battery

The NaS battery energy storage system (BESS) is a scalable modular base unit of 250 kW/1.45 MWh designed to be installed at gigawatt scale. Suited for large-scale energy storage applications of six hours or more, the NaS BESS is capable of functioning in extreme heat conditions without the need for air conditioning.

CATL unveils new sodium battery - Batteries International

Sodium batteries have a lower incidence of battery fires than conventional lithium batteries. The official energy density of the new sodium-ion battery has not been reported -- however, CATL said it aims to exceed 200Wh/kg. Although the battery should launch in 2025, mass production is unlikely until 2027.

Smart Sodium Storage System

The Smart Sodium Storage System project will develop a new sodium-ion battery architecture, optimised for use in renewables storage applications, by building on the world-class energy materials research and deep industry ties of the Institute for Superconducting and Electronic Materials (ISEM).

Australia: Sodium-ion batteries get commercial rollout as li-ion

Sydney Water's Bondi sewage pumping station will soon be storing solar energy through the use of 30 kWh of sodium-ion batteries, a cheaper alternative to the traditional lithium-ion batteries.

Sodium-Ion Batteries Australia

Sparc Technologies is developing a novel process for producing hard carbon from low-cost, sustainably sourced green bio-waste, shaping the future of eco-friendly energy storage solutions in Australia. Sparc is among the only listed companies in ...

Northvolt's Revolutionary Sodium-Ion Battery Packs Serious Punch

Sweden's Northvolt is touting a specific energy of 160 watt-hours per kilogram for its newly announced sodium-ion battery cell. While short of the energy density of the best lithium-ion battery cells - for example, Tesla's vehicle batteries at the cell level have 190-200 Wh/kg for LFP and 275-300 Wh/kg for nickel-based cells - the density is enough to make sodium-ion a viable

QUT researchers deploy Australia's first sodium-sulfur battery

QUT researchers as part of the National Battery

Testing Centre (NBTC) project have deployed Australia's first large-scale sodium-sulfur battery (NaS battery) at IGO's Nova nickel-copper-cobalt mine site, southeast of Kalgoorlie in Western Australia.

Applications

Australian Energy Storage Company Reveals Exceptional Results In Sodium ...

Sparc Technologies, an Australian energy storage company, together with Queensland University of Technology (QUT) has recently announced groundbreaking results in its development of sustainably sourced hard carbon anode material for sodium-ion batteries (SIBs). This breakthrough Sodium Ion Battery Materials Project has the potential to

Australia pilots 1.5 MW sodium sulfur battery

State-owned generator CleanCo Queensland is piloting Australia's largest grid-connected sodium sulfur (designated NaS in its chemical symbol) long-duration battery energy storage system (BESS) at the Swanbank Clean Energy Hub, 45 km southwest of Brisbane. The 1.5 MW NaS BESS provides a minimum of six hours of energy storage and is part of a ...
