In building the solarCity, which was subsidized by the EU and the province of Upper Austria and designed by internationally recognized architects, the Provincial Capital of Linz has realized an urban development project that has attracted a great deal of notice.

What is Solar City?

Ultimately, it was decided from the earliest inception that a project should be realised of a high architectural and ecological quality and value. At the beginning of the third millennium, Solar City is Austria's largest urban development project.

Will SolarCity become a model for urban development in the 21st century?

The joint determination of objectives and specification of plans, as well as the institution of a central project management team, guaranteed the successful realization of the project. As a result of its integrated approach, chances are high that the solarCity will become a model for urban development in the 21st century.

Austria solar city houses

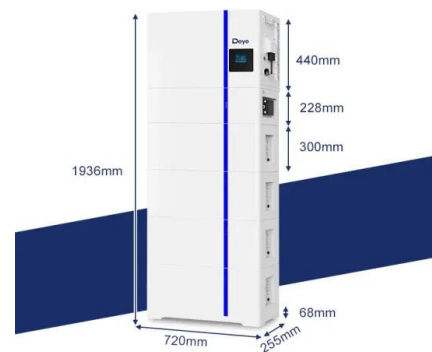

The concept of ecocities and solarCity Linz, Austria, as

Austria, introduced a policy of low-energy social housing. At that time 12,000 people were looking for homes in the Linz area. Simultaneously awareness was increasing that high consumption of fossil energy was a significant contributor to the green-house effect. Both facts provided decisive arguments for an ecological and sustainable housing

Solar City. In Austria la città del sole e dell'utopia.

Vivace, colorata, e soprattutto, chi l'avrebbe mai detto, solare, oggi Solar City è in grado di ospitare ben 25.000 persone anche se al momento ad abitarvi sono solo in 3.500 circa. Ma passiamo ora agli aspetti più pratici e ...
