Batterie solaranlage kosten St Kitts and Nevis

Overview

On successful completion of this fully integrated solar photovoltaic system and a lithium-ion battery energy storage system (BESS), the facility will supply Saint Kitts with 30% to 35% of consumers' annual electricity demand by utilizing sustainable and renewable solar energy with ZERO carbon emissions.

On successful completion of this fully integrated solar photovoltaic system and a lithium-ion battery energy storage system (BESS), the facility will supply Saint Kitts with 30% to 35% of consumers' annual electricity demand by utilizing sustainable and renewable solar energy with ZERO carbon emissions.

The project will provide the island of St Kitts with 35.7 MWp of solar capacity representing 30 – 35% of the annual electricity demand and 43.6 MWh of battery storage. The landmark infrastructure project will replace over 4,000,000 gallons of diesel per year providing a cost reduction of up to 40% compared to current diesel power generation.

On successful completion of this fully integrated solar photovoltaic system and a lithium-ion battery energy storage system (BESS), the facility will supply Saint Kitts with 30% to 35% of consumers' annual electricity demand by utilizing sustainable and renewable solar energy with ZERO carbon emissions.

List of Kittitian solar panel installers - showing companies in Saint Kitts and Nevis that undertake solar panel installation, including rooftop and standalone solar systems.

“The cost of this project to St. Kitts and Nevis citizens is zero,” said Bryan Urban, Executive Vice President and Head of Leclanché Stationary Business Unit. “It is being fully paid-for over 20 years through the savings created by the switch to clean and reliable solar energy.”
