Battery storage for solar panels Christmas Island

Overview

Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park. We installed solar and battery storage systems at two sites on Christmas Island for Parks Australia to provide clean power to their main headquarters and research field station.

Christmas Island - home to the greatest migration of red crabs in the world, and an island that is almost all national park. We installed solar and battery storage systems at two sites on Christmas Island for Parks Australia to provide clean power to their main headquarters and research field station.

The solution is comprised of: 11,7 kW solar installation and 14.4kWh Tesvolt battery system. The switch from polluting diesel to renewable energy has resulted in lower maintenance, silent and environmentally friendly operation and lowered operational costs by around 75%.

Delivered in cooperation with Australian EPC Unlimited Energy, the off-grid system is powering a far-flung farm by the combination of a 53 kW solar PV installation, which feeds into a 160 kWh saltwater battery system from U.S. producer Aquion Energy and a 48 kWh lithium-ion battery from German manufacturer Tesvolt.

However, if you're interested in investing in solar or solar plus storage because you want to continue to power your home even in the event of a grid outage, you'll need to make sure that the battery you are installing has islanding capabilities.

The federal Morrison government has unveiled plans to underwrite the construction of a 1MW solar farm on Christmas Island, an external territory in the Indian Ocean with a population hovering .

Solar Islanding and Anti-Islanding: What You Need to Know

By creating a small "solar energy island" your solar panels can keep operating your home without the risk of adding any unexpected electricity to the grid. To achieve this effect, you need special inverters that can operate in solar inverter island mode and big, reliable batteries. Both the specialized inverters and backup battery storage
