Being cheated when buying photovoltaic panels

Overview

Be aware of solar energy scams - everything from scammers pretending to be affiliated with the government or utility company to businesses misrepresenting the cost of improvements, savings, and fin.

Be aware of solar energy scams - everything from scammers pretending to be affiliated with the government or utility company to businesses misrepresenting the cost of improvements, savings, and fin.

If your company offers solar energy, remember that claims must not only be truthful, but also comply with established consumer protection laws, including the FTC Act and the FTC's new Impersonation Rule. Be truthful. Every clean energy company has a responsibility to be honest and upfront with consumers.

Here's how to dodge solar panel scams and identify red flags. Can solar panels save you money?

Interested in understanding the impact solar can have on your home?

Red flags and signs of a solar panel scam. There are several steps in the process of getting solar panels for your home, and there are different red flags you could encounter along the way: Watch out for ads that make wild promises like "free solar panels" and "special programs ending soon".

While you are browsing solar power companies, one of them may offer to install a solar panel or solar roof in your home for a small cost or even for free. It's an intentionally misleading claim. How do I know if a solar salesperson is fraudulent?

Select one of our top three recommendations from the panel below to get started on your solar journey safely: High-pressure sales tactics, exaggerated promises and claims of "free" solar panels are three major red flags to look out for when determining if a solar salesperson is fraudulent or misleading.

Are you getting ripped off when buying solar panels?

Solar is expensive, no matter how you shake it. And savings sound nice, but if you get stuck with an overpriced solar panel system that's underperforming, you're going to save much less. That's why we put together these tips to avoid getting ripped off when buying solar panels -- backed by expert advice.

Are solar leases and PPAs a scam?

No, not all leases and PPAs are scams. However, they seem to be a breeding ground for deceptive and predatory practices, including the old "government is paying people to go solar" scam. Related reading: [Solar Leases vs. Solar Loans vs. Solar PPAs](#).

Are homeowners paying for solar panels in a lease or PPA?

In short, free solar panel ads are typically for leases and power purchase agreements (PPAs). These arrangements are basically long-term solar system rentals in which the solar company owns the panels and homeowners pay a monthly fee in lieu of their electricity bill. So, are homeowners technically paying for solar panels in a lease or PPA?

No.

How do I avoid a crappy solar panel deal?

To avoid a crappy solar panel deal, watch out for these scammy sales tactics. Dealing with door-to-door salespeople is annoying, no matter what they're selling. But the solar industry is full of bad actors, with solar salespeople knocking at your door with misleading offers and overpromised savings.

What should I avoid if I'm getting a free solar panel?

Steer clear of any emails, social media posts or pop-ups that boast unlikely amenities and freebies. These might include free solar panels, sales ending imminently and anything else that seems too good to be true.
