How long do solar panels last in Brussels?

Private individuals in Brussels installing photovoltaic panels receive green certificates for ten years. The system adjusts rates annually to ensure a return on investment within seven years. Solar panel regulations vary regionally.

How much do solar panels cost in Flanders?

The cost of solar panels has decreased in recent years, making them more accessible. Currently, a 5,000 Wp installation costs around €6,000 including VAT. Government subsidies for solar panel installations are gradually phasing out. In Flanders, the maximum subsidy for 2024 is €375, down from €750.

Belgium solar panel system house

End of the compensation scheme for your solar panels

A number of changes have been brought in since 1 January 2020, causing great confusion among owners of photovoltaic panels. The end of the compensation scheme for the consumption/feed-in of self-produced energy is now effective in the Brussels Region parallel, the number of green certificates granted to prosumers is expected to fall.

DELEX Belgium

Photovoltaic Panels. Are you looking for the ideal solution to control your energy bill, reduce your ecological footprint or make your home more profitable? Invest in a photovoltaic system! It's the first step towards the energy transition and allows you to control all or part of your electricity bill.

Home Energy Storage (Stackble system)

- 
High Efficiency
- 
Easy Installation
- 
Safe and Reliable
- 
Perfect Compatibility

Product Introduction

-  Scalable from 10kWh to 50kWh
-  Self-Consumption Optimization
-  Integrated with inverter to avoid the compatibility problem
-  LiFePO4 battery, safest and long cycle life
-  Backdoor design, effortless installation
-  Capable of High-Powered Emergency-Backup and Off-Grid Function
