Aquion Energy Aspen 24S-83 Aqueous Hybrid Ion Saltwater Battery Featuring Aqueous Hybrid Ion (AHI™) technology for energy storage systems. The Aspen 24S-83 battery is a clean, 24 Volt , saltwater battery that outperforms and outlasts traditional lead acid batteries.

Bolt Ultra Advanced Silicate-Salt Green Battery Technology. Low cost (up to 60% less than lithium batteries) Long lasting, fast charging capability, low internal resistance; Use in starter and deep cycle applications; Capable of 100% depth of discharge, no memory effect; Maintenance-free, non-corrosive, non-explosive.

Saltwater battery price still needs to be reduced, and perhaps researchers could even find a way to increase its energy density without sacrificing its safety, making it a stronger rival for lead-acid or nickel-type batteries.

A 5kW solar system (the minimum size we recommend for a battery + solar setup) cost around \$9,000 at the time the batteries became available. The price of solar has of course dropped a lot since then.

The Sodium Ion Battery chemistry is optimal for any stationary, long duration, daily cycling application, including off-grid and weak-grid microgrids, telecom systems, and residential solar. Our products' significant technological advantage relative to lead acid batteries lead to vastly improved lifetime project economics for the end user.

'Significant breakthrough': This new sea salt battery has

If you have a \$10,000 Lithium battery and a \$10,000 "sea salt" battery, the "Sodium Sulfur" battery will have 4 times the capacity of lithium battery For probably 6 times more weight. This means that those batteries would be great for grid storage or other applications where weight is not a problem, but they will not find their way to power
