Bhutan phi energy

Overview

Energy in Bhutan has been a primary focus of development in the kingdom under its Five-Year Plans. In cooperation with India, Bhutan has undertaken several hydroelectric projects whose output is traded between the countries. Though Bhutan's many hydroelectric plants provide energy far in excess of its needs in.

Until 2002, Bhutan's energy sector was overseen by the Department of Power under the Ministry of Trade and Industry. In 2002, reforms in the executive body, the , produced three new agencies under the .

In the early 21st century, about 70 percent of all energy consumption in Bhutan was in the household sector. Heating and cooking with in particular accounted for between 70 and 90 percent of total energy consumption and virtually 100 percent of.
