

## European Solar and Energy Storage Solutions

# Bosnia and Herzegovina smartenergy device

## Overview

---

Should Bosnia and Herzegovina use more energy?

Bosnia and Herzegovina could do a lot more to use energy efficiently. Electricity prices are kept artificially low and there is therefore limited incentive to make savings. The country is almost four times as energy-intensive as the average in EU countries and has the highest energy intensity in the Western Balkans.

Why should Bosnia and Herzegovina invest in an integrated strategy?

An integrated strategy will provide investors with certainty and predictability, leading to a diversified economy and sustainable jobs creation. “The forthcoming National Climate and Energy Plan will put Bosnia and Herzegovina on the right path to ensure the energy security while improving its long-term resilience to climate change.

What does the renewables readiness assessment mean for Bosnia & Herzegovina?

“The Renewables Readiness Assessment represents an important step in the process of gradual transition from fossil fuels to renewable energy sources on the way to the decarbonisation of Bosnia and Herzegovina’s energy sector by 2050, for which we are grateful to IRENA.

Why should Bosnia and Herzegovina adopt the necp?

With the adoption of the NECP, Bosnia and Herzegovina should seek to improve the country’s long-term resilience, advance its economic diversification and competitiveness, and to secure its energy supply and sovereignty by harvesting its natural renewable resources.

Why does Bosnia & Herzegovina suffer a heavy cost of air pollution?

Sarajevo, Bosnia and Herzegovina, 25 September 2023 – Despite being a net electricity exporter, Bosnia and Herzegovina (BiH) bears the heavy cost of air

pollution and health impacts due to the dominance of fossil fuels in its current energy mix.
