consumption management and energy storage.161 3.4.3.1 policies and measures to achieve energy security.161.

In 2021, the largest source of energy in Bosnia and Herzegovina was coal (51%), followed by oil with 22% contributing to the total energy supply. In terms of electricity generation, 60% was generated from coal and 37% was generated from hydropower.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided.

BiH has significant renewable energy potential, particularly in hydropower and wind power capacity. Hydropower provided 29 percent of the country's total electricity production in 2022 and there is room for additional growth.How is

energy produced in Bosnia and Herzegovina?

Energy production in Bosnia and Herzegovina is carried out using primary energy from solid fuels, wood biomass, hydropower, as well as other forms of RES (solar and wind energy).

How to address energy poverty in Bosnia and Herzegovina?

To address energy poverty in Bosnia and Herzegovina, a number of key activities need to be undertaken. Here are some of the main activities that could be implemented: Analysis and identification of areas with the highest energy poverty: The first activity is to conduct a thorough analysis to identify areas with the highest energy poverty.

How to promote energy transformation in Bosnia & Herzegovina?

Promote the implementation of programmes, priority measures, and activities in the sector of energy transformation, transmission, and distribution of natural gas, planned within the existing strategic and planning documents and relevant energy companies. In 2021, Bosnia and Herzegovina imported practically all quantities of oil derivatives.

What is the integrated energy and Climate Plan in Bosnia & Herzegovina?

1.1.3.3 Policies and measures to achieve goals The Bosnia and Herzegovina integrated energy and climate plan prescribes policy instruments and appropriate measures to achieve the goals by 2030. An overview of the plan policies and measures is given in the Table below. Establishing the legal obligation to perform a cost-benefit analysis.

Why did Bosnia and Herzegovina accept the Energy Community Treaty?

By accepting the Treaty on the Energy Community, Bosnia and Herzegovina undertook to take over the basic guidelines of EU energy legislation, the so-called *acquis communautaire*. The Treaty and the *acquis* are constantly evolving to cover new sectors, as well as to update or replace older acts.

Can Bosnia and Herzegovina cooperate with other countries?

As part of the energy and climate plan, Bosnia and Herzegovina is considering the possibilities of cooperation with other countries in the region on several levels: Energy projects: The plan considers cooperation in terms of joint energy projects, such as the construction and management of energy

infrastructures.
