It's often hard to imagine spending \$25,000 to save money on electricity costs, but people really do save money with solar panels. One way to picture going solar is buying 25+ years of electricity at a bulk rate.

When it comes to home solar, California is, in many ways, an entirely different world than the rest of the US - especially with NEM 3.0 in effect.

There are competing market forces pushing and pulling the price of solar panels in 2023. These include supply chain tangles leftover from the pandemic, trade tariffs, a surge in US manufacturing, and local policy changes.

We find that understanding the average cost of solar panels empowers homeowners to make better decisions when they get serious.
