Cella Energy, wins \$250,000 to develop hydrogen fuel ...

Cella Energy, Energy Storage Challenge Winner, uses a technique developed and spun out of LCN research, to develop low-cost hydrogen storage materials. The result is a fuel with more energy than gasoline or lithium-ion batteries that ...

Nauru: Energy Country Profile

Nauru: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Cella Energy Generators

The two working demonstrators were developed to show how Cella Energy could use hydrogen-generated electrical energy to power unmanned aircraft and also extend the range of the craft. The first version was shown at the Unmanned Systems show in Orlando in May 2014 and helped to raise additional funding for further development of the technology.
