Overview

Why is Central African Republic investing in electricity?

With an electrification rate of 35% in Bangui, 8% in the main provincial cities and towns, and only 2% in rural communes, the Central African Republic has invested in the energy sector as an engine of development to increase access to electricity and promote sustainable growth.

Why does Central Africa need an energy mix?

This is a unique capacity which allows Central Africa to achieve an energy mix and also to boost its electrical power for industrialization and social development needs (health, education, household).

How many people have access to electricity in Central African Republic?

Less than 3% of the population has access to electricity in Central African Republic. Grid-based electricity supply is insufficient to meet electricity demand: it is unavailable 28% of the year on average, mainly due to generation outages.

Did Central African Republic import electricity?

Central African Republic did not import electricity. Power generation, which includes electricity and heat, is one of the largest sources of CO2 emissions globally, primarily from the burning of fossil fuels like coal and natural gas in thermal power plants.

Where is Central African Republic launching a new solar park?

BANGUI, November 17, 2023 – Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui. The park will supply electricity to 250,000 persons in the capital, almost doubling the country's electricity generation capacity.

What can ECA do for Central Africa?

ECA and partners were also called upon to help build the capacity of sub-regional experts, particularly by tooling them with techniques for designing and negotiating bankable projects. In 2020, installed electricity capacity in Central Africa stood at 13.81 Gigawatts, with the predominance of hydroelectricity followed by thermal energy.

Central African Republic power solutions as

Hydropower in Central Africa

The Central African Republic has revealed plans to expand its use of renewable energy resources such as hydropower and solar. About 30 sites for hydropower development with capacities between 0.5-180 MW were identified to exploit the 3,000 MW potential of the country.
