China Southern Power Grid Integrity Microfilm

Overview

What is China Southern power grid?

China Southern Power Grid (“Southern Grid”) is one of China’s two major state-owned power distributors that serve five southern provinces: Guangdong, Guangxi, Yunnan, Guizhou and Hainan. The region has witnessed a rapid build-up of power generation capacity, from 275 GW in 2015 to 350 GW in 2020.

Does China have a power grid?

China has two major national power generation and transmission utilities -- State Grid Corp of China and China Southern Power Grid. State Grid covers about 26 provinces in eastern, central and northern regions, while the latter covers five provinces in southern China.

Can China decarbonize the southern power grid by 2060?

Decarbonization of the Southern Power Grid in China is feasible by 2060 but requires converting a large cropland area to support solar and wind energy; expansion of hydropower will impact the transboundary rivers according to a power system optimization model set up for 2020–2060.

Why is China's power grid creaking?

China ’s creaking grid represents a major constraint to progress on its green energy transition. During the first four months of this year alone, China invested Rmb122.9bn (\$17bn) in its power grid projects, a 24.9 per cent year-on-year increase.

What percentage of the CSPG generation mix is used by hydropower?

Another hefty fraction of the generation mix (roughly 22%) is accounted for by hydropower, with more than 32 GW deployed by 2060. In other words, 83%, 66%, and 100% of the available (new) capacity for solar, wind, and hydropower is exploited by 2060. Fig. 2: Capacity and generation mix over the period 2020–2060 in the CSPG.

How does regional power grid and market integration affect international political developments?

Southwest Asian (Middle East), South Asian (Indian subcontinent), and Southeast Asian (Greater Mekong) efforts toward regional power grid and market integration are impacting international political developments, even as the story of electricity trade in each subregion is politically distinct.
