Commercial Solar PV Investment

Overview

This webpage provides an overview of the federal investment and production tax credits for businesses that own solar facilities, including both photovoltaic (PV) and concentrating solar-thermal power (CSP) energy generation technologies.

To be eligible for the business ITC or PTC, the solar system must be: 1. Located in the United States or U.S. territories 2. Use new and limited previously used equipment 3. Not leased.

The ITC is an upfront tax credit that does not vary by system performance, while the PTC can provide a more attractive cash flow, as the tax credits are.

To qualify for the full ITC or PTC, projects which commenced construction prior to January 31, 2023, must satisfy the Treasury Department's labor requirements: all wages.

While the PTC is calculated based on the electricity produced by a system, the ITC is calculated based on the cost of building the system, so understanding what expenses are eligible to.

Does a commercial solar project have a return on investment?

A commercial solar project does have a return on investment, with a significant portion being received during the first year or two in the form of tax credits, depreciation, and USDA grants. This immediately provides you with extra capital to invest in other areas of your business.

Can commercial solar panels save money?

Switching to solar energy can save businesses, government agencies, and nonprofit organizations money while also reducing their carbon footprint. Commercial solar panels harness the power of the sun to provide electricity for office buildings, factories, and warehouses. Where Can Commercial Solar Panels Be Installed?

.

How much tax credit can a solar PV system receive?

26% in 2021, and 10% for systems commencing construction in 2022 or thereafter. Any PV system placed in service after 2023, regardless of when it commenced construction, can receive a maximum tax credit of 10%.² Typically, a solar PV system that is eligible for the credit must use new and limited previously used equipment.³ Systems must use

Why should you invest in commercial solar energy?

Investing in commercial solar energy supports sustainability goals by providing 100% clean energy, reducing a company's carbon footprint and achieving emissions targets. In 2020, U.S. customers experienced two power outages a year totaling eight hours of power interruption and costing businesses a whopping \$150 billion.

Why is commercial solar development increasing?

This expected increase in commercial solar development is because the typical return on investment for a solar system has been shortened to 5 to 8 years thanks to the extended federal tax credit, various state rebates, and five-year accelerated depreciation.

Why should you choose a commercial solar installer?

Organizations going solar enjoy many benefits and incentives: the solar tax credit, electric bill offset, MACRS depreciation, a quick payback, and green bragging rights. SolarReviews has compiled a list of the best commercial solar installers based on consumer reviews.
