

European Solar and Energy Storage Solutions

Compact solar Slovenia

Overview

In March 2019 the Slovenian Government adopted the renewed Regulation on Self-Reliance on Electricity from Renewable Sources (“Regulation”), which regulates the net-metering model. The net-metering model was first introduced in Slovenia in 2015 and has proved a great success. There are (as of the end of 2018).

Solar electricity has always been associated with high costs, which is why support schemes are still important for generating investment in renewable energy production. The.

In order to manage the construction and installation costs of the photovoltaic power plant, investors may apply for favourable loans or grants from the Eco Fund, the Slovenian Environmental Public Fund. Project loans for.

Where can I find a list of solar power plants in Slovenia?

Since 2007, the Slovenian Photovoltaic (PV) Portal has been providing information on solar energy in the Slovenian language. It is the only place where you can find a list of all solar power plants in Slovenia in one place, find basic information on the individual building blocks of solar power plants and find out about new developments.

Will Slovenia add 258 MW of solar capacity in 2022?

Slovenia could potentially add 258 MW of new solar capacity in 2022, according to new figures from the Slovenian Photovoltaic Association (SPA). The country installed 194 MW of solar in the first three quarters of 2022, according to its distribution system operator, SODO. Almost all capacity was added in the residential sector.

What is the potential of photovoltaic energy in Slovenia?

Slovenia offers great potential for exploiting photovoltaic energy due to evenly spread solar irradiation. The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017, 4,231 photovoltaic power plants had been installed in Slovenia with a total power of 267 MW.

Will Slovenia switch from solar panels to solar plus storage?

Subsidies in the residential sector will shift from solar panels alone to solar plus storage, it said, without providing additional details. Slovenia plans to start its first green hydrogen projects in 2023, under the European Union's Just Transition Fund, according to the SPA.
