Cylinder wind-induced vibration power generation

Overview

What is a bladeless wind turbine?

Clearly bladeless technology consists of a cylinder fixed vertically on an elastic rod, instead of tower, nacelle and blades which are the crucial parts of a conventional wind turbine. The cylinder oscillates on a specifically mentioned wind range, which then generate electricity through an alternator and a tuning system.

What is vortex induced vibration?

Vortex induced vibration (VIV) is the aftermath of a phenomenon known as vortex shedding effect which predominantly occurs on a bluff body, when it got immersed in a fluid. Fluctuating pressure difference resulting from the flow produces a lift force perpendicular to the flow direction.

How a bladeless wind turbine is different from a conventional wind turbine?

The forces necessary to generate power in bladeless turbine differ from those conventional wind turbines. This device traps the energy of vorticity. As the wind passes a structure its direction of flow reverts and cyclical vortices pattern are formed. The usage of conventional wind turbine in lesser area and lower cost is never practical.

Which cylinders are most effective as Viv energy harvesters?

Regardless of these counter-acting formation effects, it is consistent among all formations that the second row of cylinders are the most effective in terms of power output when used as VIV energy harvesters.

How does bladeless wind power work?

In bladeless wind power, the mast is arrested to the ground and a rib structure is attached at the top portion of the mast which carries a thread arrangement. Energy can be derived by persistent oscillation of the mast.

Why is bladeless wind turbine a good option in India?

5. Conclusion In a country like India, having more rural population and condition suiting for electricity generation through bladeless wind turbine is the best solution. It also focuses on increasing the percentage of renewable energy for electrical power and provides energy more economically.

Cylinder wind-induced vibration power generation

Enhancing vortex-induced vibrations of a cylinder with rod ...

Enhancing vortex induced vibrations of a cylinder with rod attachments for hydrokinetic power generation . Junlei Wang 1, Wei Zhao 1, Zhen Su1, Guojie Zhang1, * designed a device ...

A humidity resistant and high performance triboelectric nanogenerator

Wind energy is a promising renewable energy source for a low-carbon society. This study is to develop a fully packaged vortex-induced vibration triboelectric nanogenerator (VIV-TENG) for ...

Vortex-induced vibration triboelectric nanogenerator for low speed wind

The simulation can further illustrate the processes of charge transfer and voltage generation. The following is the Supplementary material the average power density is ...

Design Improvement of the Small-Scale Vortex ...

In this paper, a modification of the mast, which is

the main part of a vortex-induced wind generator was considered in order to improve the performance. Numerical simulations were applied to investigate the change in ...

Multi-piezoelectric energy harvesters array based on wind-induced

PEHs are placed in a wind field, and the cylinder undergoes vortex induced vibration under wind excitation. The cylinder vibrates left and right in the direction of vertical ...

The Performance of Magnetostrictive Material for Wind-Induced Vibration

The power harvester unit from flow-induced vibration (FIV) was designed to harness energy from low flow velocity based on the magnetostrictive effect on the galferol (Fe ...

Piezoelectric Power Generation from the Vortex ...

The aim of this work is to design a piezoelectric power generation system that extracts power from the vibration of a cantilever beam. A semi-cylinder placed in a water stream and attached to the

A humidity resistant and high performance triboelectric ...

induced vibration triboelectric nanogenerator (VIV-TENG) for scavenging wind energy. The VIV-TENG consists of a wind vane, internal power generation unit, an external frame, four springs, ...

of a Wind-Wave Combined Power Generation System under ...

The use of vortex-induced vibration for power generation, which does not The overall structure of a Spar-type floating wind turbine is a deep-draft slender cylinder, which mainly consists of

Numerical Study on a Cylinder Vibrator in the Hydrodynamics of a Wind ...

A hydrodynamic wind-wave combined power generation system is a new type of energy device that uses wind and ocean current energy to generate electricity. In this paper, ...

The Performance of Magnetostrictive Material for ...

The power harvester unit from flow-induced vibration (FIV) was designed to harness energy from low flow velocity based on the magnetostrictive effect on the galphenol (Fe - Ga alloy) strip

(PDF) Piezoelectric Power Generation from the Vortex-Induced Vibrations

The aim of this work is to design a piezoelectric power generation system that extracts power from the vibration of a cantilever beam. A semi-cylinder placed in a water stream and attached to ...

Experimental Investigation of Reynolds Number and Spring

...

Herein, a vortex-induced vibration-driven square cylinder triboelectric nanogenerator (SC-TENG) is proposed and investigated. The occurrence and development process of the square cylinder ...

Enhancing vortex-induced vibrations of a cylinder with rod ...

Abstract. A new converter consisting of a circular cylinder on an end-spring is proposed to harness hydrokinetic power from water flow and tides. Two cylindrical rods with small diameter ...

Vortex-induced Vibrations of a Confined Circular Cylinder ...

The amount of power extracted by the cylinder is presented in section 4.5. Finally, the effect of confined on power extraction efficiency of the cylinder is discussed in section 4.6. 2. Problem ...

Vortex-induced vibration characteristics of a wind energy ...

power, with Vortex-induced Vibrations, Galloping, Four fluid-induced vibrations, including flutter and buffeting, act as energy collection mechanisms [6].Yili Hu et al. [7] proposed a ...
