

European Solar and Energy Storage Solutions

Direct sales of solar power

Overview

Was 2023 a year of historic proportions in the solar power industry?

The year 2023, according to National Renewable Energy Laboratory (NREL) analyst David Feldman, was a year of historic proportions in the solar power industry. Four times a year, Feldman and a team of analysts and data experts from NREL and the U.S. Department of Energy (DOE) compile data for NREL's Quarterly Solar Industry Update.

How much solar capacity did the US solar market install in 2023?

In 2023, the US solar market installed 32.4 GWdc of capacity, a remarkable 51% increase from 2022. This was the industry's biggest year by far, exceeding 30 GWdc of capacity for the first time.

How did the residential solar market perform in Q3 2023?

In Q3 2023, the residential solar market installed 1,832 MWdc, growing 12% year-over-year and setting yet another quarterly record. The segment's total installation volumes for the first three quarters of 2023 increased by 24% year-over-year, with thirty-four states plus Puerto Rico seeing annual growth during this timeframe.

What is the outlook for solar in the US?

Our annual Year in Review report includes extended 10-year outlooks for every segment. The total US solar fleet is expected to nearly quadruple from 177 GWdc installed at year-end 2023, to 673 GWdc installed by 2034. By 2040, solar is expected to make up the largest share of electric generating capacity in the US.

How did the utility-scale solar sector perform in 2023?

Utility-scale segment rebounds in 2023 The utility-scale solar segment rebounded in 2023 from the downturn observed in 2022. The sector grew by 77% in installed capacity compared to 2022, with a total of 22.5 GWdc

interconnected last year. This growth was acute in Q4 2023, which was a record quarter for the segment by over 4 GWdc.

What percentage of US electricity generating capacity is solar?

Solar accounted for 53% of all new electricity-generating capacity added to the US grid in 2023, making up over half of new generating capacity for the first time. The residential segment set another annual record at 6.8 GWdc installed in 2023, growing 13% over 2022.
