## Overview

---

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

What is the Djibouti office for geothermal energy development?

The Djibouti Office for Geothermal Energy Development (Office Djiboutien de Développement de l'Energie Géothermique, ODDEG), directly overseen by the presidency, is charged with developing the country's geothermal energy potential. ODDEG was set up in 2013 to expand and operationalise the sector.

How many people in Djibouti have access to electricity?

In Djibouti, 42% of the population has access to electricity. The government's Vision 2035 establishes goals to promote renewable energy source use for electricity generation and to pursue fuel-switching measures from fossil to renewables.

Who regulates geothermal energy in Djibouti?

The Ministry of Energy and Natural Resources formulates policies for the sector and regulates the electricity market. The Djibouti Office for Geothermal Energy Development (Office Djiboutien de Développement de l'Energie Géothermique, ODDEG), directly overseen by the presidency, is charged with developing the country's geothermal energy potential.

Will Djibouti become the first African country to meet 100% electricity demand?

The authorities have announced plans to transform Djibouti into the first African country to fulfil 100% of its electricity demand from clean energy

sources by the close of the plan in 2035. The Ministry of Energy and Natural Resources formulates policies for the sector and regulates the electricity market.

Can Djibouti produce geothermal energy from urban waste?

To this end, US-based CR Energy Concepts, in collaboration with the Ministry of Energy and Natural Resources, launched a project in 2019 to produce 35 MWh of baseload electricity from urban waste. Exploration of Djibouti's geothermal potential began in the 1970s, but progress in subsequent decades was slow.

---

### **USAID/Djibouti Renewable Energy Activity , Fact Sheet , Djibouti ...**

Increase Domestic Energy Output: The 35 Megawatts per hour of base-load electricity produced by the Renewable Energy Park will contribute to 30 percent of Djibouti's current energy needs. Generate Jobs: The Renewable Energy Park and five regional transfer stations will generate 140 new white and blue collar jobs.

### **Collaboration with DGA Energy Solutions Australia to study ...**

About DGA Energy Solutions Australia Pty Ltd  
DGA Energy Solutions Australia Pty Ltd (DGA) was founded in 2023 as a wholly owned subsidiary of Mitsubishi Corporation. DGA is responsible for Mitsubishi Corporation's Power Solution Group renewable energy and green hydrogen/ammonia production project investment and development in Oceania regions.

### **Policy Memo: Strategic Deployment of Mini-Grids to Enhance ...**

Mini-grids powered by renewable energy can help improve electricity access and aligns with Djibouti's goal of 100% Renewable Energy by 2035. This policy memo advocates for accelerating mini-grid deployment through capital subsidies, public-private partnerships, and capacity-building programs.

## ZEN Partners With DGA Energy Solutions Australia to Deliver

...

DGA Energy Solutions Australia Pty Limited (DGA), which is 100% subsidiary of Mitsubishi Corporation (MC), and ZEN Energy (ZEN) have executed a Memorandum of Understanding for over 25 years, FCW has been the go-to source for news, information, and analysis. Join our community of industry leaders and innovators. Become a Member , Login.

## Renewable Energy and Sustainability for Female Entrepreneurs in Djibouti

Renewable energy and sustainability present significant opportunities for female entrepreneurs in Djibouti. From solar energy initiatives to eco-friendly businesses, women in Djibouti are increasingly using green solutions to power their enterprises, create job opportunities, and contribute to environmental sustainability.

## USAID/Djibouti Renewable Energy Activity , Fact Sheet , Djibouti

Increase Domestic Energy Output: The 35 Megawatts per hour of base-load electricity produced by the Renewable Energy Park will contribute to 30 percent of Djibouti's current energy needs. ...

## DGA Energy

DGA Energy is distinguished from the

competition by our ability to supply customers with energy as they need it, at a fraction of the rates others are typically charging. From short-term interim requirements to contracts for long-term use (up to 20 years) and everything in between; we offer our clients customized contracts for their energy needs.

## Djibouti redesigns energy systems to increase power generation

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.
