Do I need to apply for solar power generation

20 ft container

40 ft container

Overview

Before you install your solar panels, wind turbines or other distributed energy resources, and before you connect to our grid, you'll need to submit an interconnection service application.

Before you install your solar panels, wind turbines or other distributed energy resources, and before you connect to our grid, you'll need to submit an interconnection service application.

Your solar generating system must be installed, permitted, and approved for interconnection. Your city or county will perform an onsite inspection and provide the required permit (s). How do I choose a solar contractor?

Take a free Home Energy Checkup. PG&E can recommend resources and questions to ask when choosing a contractor. Find a contractor. Understand the financial considerations and benefits of investing in renewable energy. Explore leasing versus purchasing options and estimate the size of the system using our solar calculator.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version here.

How do I get solar power?

Here are the steps to take to get powered by sunshine. Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar.

Do you qualify for a free home solar system?

Homeowners may qualify for a free home solar system from our partner, GRID Alternatives. Find out if the Disadvantaged Communities - Single-family Solar Homes (DAC-SASH) program, a state of California program for low or fixed-income families, can help you. Your home must be in a DAC to qualify. Learn more [Do You Rent and Still Want Solar?](#)

.

What should I consider when buying a solar system?

Remember to consider any recent or future changes to your home that may affect your usage. For example, you may have just bought new energy-efficient appliances, or you could be planning to buy an electric vehicle that will need charging. Evaluate your finance options. You can buy or lease a PV system.

When will SCE provide authorization to operate my solar system?

SCE will provide authorization to operate the solar system once proper installation and permitting are completed. Once your solar system is installed and you have been given the authorization to operate your solar system, you will be interconnected with our electric grid.
