Download the State Grid Photovoltaic Panel Manual

Overview

Where can I find a manual for a photovoltaic (PV) system?

Address: No.1699 Xiyou Rd., New & High Tech Zone, Hefei, 230088, China.

The manual mainly describes the product information, guidelines for installation, operation and maintenance. The manual cannot include complete information about the photovoltaic (PV) system.

How do I design a PV Grid connect system?

The document provides the minimum knowledge required when designing a PV Grid connect system. The actual design criteria could include: specifying a specific size (in kWp) for an array; available budget; available roof space; wanting to zero their annual electrical usage or a number of other specific customer related criteria.

What are the design criteria for a grid connect PV system?

The actual design criteria could include: specifying a specific size (in kWp) for an array; available budget; available roof space; wanting to zero their annual electrical usage or a number of other specific customer related criteria. Determining the energy yield, specific yield and performance ratio of the grid connect PV system.

How do I install a solar photovoltaic system?

Installing solar photovoltaic systems requires specialized skills and knowledge. Installation should only be performed by qualified personnel. Before installing a solar photovoltaic system, installers should familiarize themselves with its mechanical and electrical requirements.

How do I sizing a photovoltaic system?

The system configurator available on Power-One's web site at may help in sizing a photovoltaic system. When more than one inverter is used, remote monitoring can be implemented through a sophisticated communication

system based on an RS-485 serial interface, with a USB port to facilitate access during installation.

Do I need to meter a photovoltaic system?

It is assumed that aluminum framed photovoltaic (PV) panels mounted on a “post” and rail mounting system, the most common in the industry today, will be installed by the homeowner. While metering the system is encouraged, the specification does not address system wiring elements for associated system sensors or monitoring equipment.
