

Overview

Should Tajikistan import electricity?

While exports are the prime motivation of Tajikistan to pursue cross-border electricity trade in order to gain revenue, the option to import electricity in times of shortage should be open. Imports could also delay or avoid the need to build new thermal generation capacity.

What is electricity trading in Tajikistan?

Most electricity trading arrangements in Tajikistan today are long-term bilateral contracts with limited options for variations in volumes or price.

How much does electricity cost in Tajikistan?

A high prevailing cost of generation in a neighbouring country increases the favourability for exports, whereas a low prevailing cost of generation provides opportunity for imports. The estimated average marginal cost of generating electricity in Tajikistan is USD 6/MWh (RTE and ADB, 2020).

Are electric vehicles a sustainable solution in Tajikistan?

The road transport sector of Dushanbe is responsible for around 3% of the Tajikistan's total greenhouse gas emissions. Photo credit: Grütter Consulting. Strategies for making electric vehicles a sustainable solution include a phased implementation starting with e-buses in Dushanbe and climate finance.

Are electric vehicles cheaper than fossil fuels in Tajikistan?

The total cost of ownership of electric vehicles is comparable or lower than for fossil fuel vehicles because of low electricity prices. Electric vehicles can also reduce greenhouse gas (GHG) emissions in Tajikistan by nearly 100% since the country has a low carbon grid factor.

Should Tajikistan switch to electric vehicles?

While switching to electric vehicles is cost-effective for Tajikistan, this will require specific policies because of higher upfront costs, lack of infrastructure (i.e., power charging facilities), and limited information on electric vehicles. The study suggests tapping climate finance to cover the high capital expenditure.

Electricity battery backup Tajikistan

How Electric Vehicles Can Make Tajikistan Emissions-Free

Tajikistan produces more than 95% of its electricity with hydropower and has a large potential to expand production. However, the country lacks fossil fuel resources and is highly dependent on imported fuel. In the transport sector, these factors make shifting to electricity from fossil fuels very attractive.

Tajikistan: Energy Country Profile

Tajikistan: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
