

European Solar and Energy Storage Solutions

Elsa energy Mauritius

Overview

What services does Elsa energy provide?

We provide engineering consultancy, products/material supply, equipment leasing/sales, and inspection services. Elsa Energy provides quality, timely & cost-effective procurement solutions and offer integrated engineering & equipment packages to our clients.

Who is Elsa Energy Sdn Bhd?

ELSA ENERGY SDN BHD [200501001718 (678764-M)] is an integrated energy services & digital solution company, with proven track records and strong client-partner network in the region.

How does Mauritius generate energy?

Mauritius generates energy through various means including wind farms, solar energy, biomass, wave, and waste-to-energy projects. Currently, bagasse (sugarcane waste) is the leading source, contributing 13.3 percent to the renewable energy generation. Mauritius derives other renewable electricity from hydro, wind, landfill gas, and solar.

Does Mauritius use solar energy?

Mauritius has an attractive potential for solar energy, with an average annual solar radiation value of some 6 kWh/m²/day. Solar photovoltaic (PV) energy is an option due to the almost year-round intensive sunlight. To achieve the target of 60 percent renewable energy by 2030, Mauritius has commissioned six more solar farms.

Does Mauritius have a waste-to-energy project?

Mauritius produces about 500,000 tons of solid waste per year and its only landfill site is nearly full. In 2016, CEB (Mauritian utility company) issued a Request for Proposals for a 24 MW waste-to-energy project. Accordingly,

Does Mauritius need a battery energy storage system?

Mauritius aims to increase the share of renewable energy sources in its energy mix, which leads to fluctuating power injection. To reduce this fluctuation from variable renewable energy sources, the installation of Battery Energy Storage Systems (BESS) is required.

Mauritius: Qair awarded four Solar PV and Battery Storage

This flexible and scalable technology allows the massive integration of renewable energy on the grid by shifting solar power production for the evening demand peak where traditional solar plant do not produce.

Mauritius

Energy efficiency is now one of the main criteria in the design of public buildings and in rental of private buildings. According to MARENA, there are currently no building integrated photovoltaics in Mauritius. The Green Building Council Mauritius was set up in 2009 to promote green building and is a member of World Green Building Council.
