Energy network solutions The Netherlands

Driving the energy transition in the Netherlands

The Dutch government has set the target of halving greenhouse gas emissions by 2030. Recognising the significance of renewable energy in achieving this target, the Netherlands Energy Research Association (NERA) is actively involved in promoting and advancing sustainable energy solutions.

Energy storage: Development of the market , Deloitte Netherlands

Although it is expected that storage technologies will play an increasingly important role in the energy transition to a greener economy, the development and use of such technologies in the Netherlands - certainly at a grid scale - is currently behind that of other countries (e.g., operational capacity of 135MWh in the Netherlands compared

Innovation Workshop in corporation with Energy21 at Hightech ...

We have been invited to participate in a conference focusing on future energy solutions/fusion energy, organized as part of Energy Days on September 19th. This event is a half-day gathering with 120-150 participants, open to the public, and will feature 3-4 speakers discussing a specific topic within the energy transition. The

Our Mission

At Energy Network, we have a single mission: to provide each and every one of our clients with operational solutions and strategies around energy supply, demand, waste, and water that will stand the test of time and work well in all market environments.

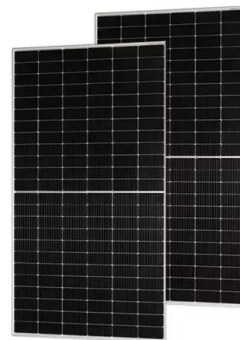

Step by step, the Netherlands is transitioning to sustainable energy

By 2050, the Netherlands wants to be using energy from sustainable sources only. There's a long way to go before this can happen. It will require new wind farms, electricity pylons, cables and ...

Renewable energy

The Netherlands is using more and more energy and its gas reserves are running out. Among other things, the country will need to switch to alternative energy sources for transport and heating. Work on this must start now. The Netherlands also wants to achieve zero carbon (CO2) emissions by 2050. So Dutch central government is taking steps to boost sustainable energy ...

Electricity as an energy source

Uniper produces electricity in the Netherlands using both traditional and sustainable methods, ensuring a reliable energy supply while actively working to reduce environmental impact. This location also serves as an energy hub where innovative sustainable solutions are integrated. Read more. The future of electricity generation.

Solar Energy Solutions

As the demand for solar energy increases across the globe, the complexities of projects are expanding. We can help you stay ahead of increasing demands to keep to pre-set budgets and timelines. Navigating the complex challenges of an evolving solar market, position yourself for success whether you are expanding in existing markets, venturing

Why You Should Launch Your Smart Grid Solution in the Netherlands

The Dutch energy network is interlinked with the in German, Danish, Norwegian and Belgian energy systems, and because of the outstanding standards applied in the Netherlands, solutions developed here are exceptionally well positioned for scaling up across Europe and beyond.

Enphase Energy Announces Collaboration with NextEnergy in the Netherlands

Enphase recently launched its IQ ® Battery 5P and IQ ® Energy Management software in the Netherlands, which enables homeowners to manage dynamic energy tariffs and can help maximize energy savings. The collaboration now enables owners of Enphase IQ Batteries to participate in NextEnergy's dynamic tariff program, as well as join its virtual power ...
