Is Eos the next home for America's battery?

"We're excited to find the next home for America's battery, where we can improve our global competitiveness, continue to create long-term job opportunities and position Eos as a leader in American-made energy storage," said Joe Mastrangelo, Eos Chief Executive Officer.

What is Eos storage & how does it work?

Eos storage systems plus Solar and Wind reliably solve the intermittency of green sources—while helping you gain community support. Non-wired Eos storage ensures critical supply during outages and congestion on today's networks—and the transition to tomorrow's infrastructure.

What is Eos BMS?

Protecting health and performance. The Eos BMS is an integrated electronics package that provides real-time operational telemetry and status, automatic protections and, in conjunction with the site controller, executes use cases and controls the Eos Cube systems, all to minimize battery stress and wear while maximizing output energy capacity.

How much does EOS cost?

It's how, at Eos, we're putting American ingenuity to work every day to create a positive future for everyone. * Assumes \$1,481/kW installation cost, 6000-8000btu/kWh heat rate, and \$5-20mmbtu fuel cost over ~14M kWh Eos equivalent output at 1MW 4-hour duration. Li-ion conservative cost-out

assumed.

What is the EOS cube?

A containerized BESS solution that fits in almost any site and weathers almost any climate. We designed the Eos Cube to bring affordable and reliable energy storage to even the harshest, remotest locations.
