Fmc energy systems Sierra Leone

Overview

Why does Sierra Leone need a flexible electricity system?

Countries like Sierra Leone are also under political and economic pressure to restructure their energy sectors and reform their utilities, which have often failed to develop flexible electricity systems that can provide firms with a reliable supply and people with access to electricity.

How can we forecast the long-term electricity demand-supply situation in Sierra Leone?

This study focuses on forecasting the long-term electricity demand-supply situation in Sierra Leone by considering techno-economic and environmental parameters. Three case scenarios have been generated (Base, Middle, and High) that will cover the country's total electricity demand.

How can the energy sector improve in Sierra Leone?

For the energy sector in Sierra Leone to improve and meet these targets at the rate required, some transformative changes are needed. Robust and resilient solutions, acceptable to a range of different stakeholders, are needed across the energy sector.

Does Sierra Leone have a good energy demand forecasting study?

There has been no proper energy demand forecasting study in Sierra Leone for the past decade. However, energy demand forecasting for short, medium, and long-term planning has been carried out by many researchers.

What is the power generation capacity in Sierra Leone?

The power generation capacity in Sierra Leone is currently dominated by liquid fuel generation units, which have very high level of CO₂ emissions per unit electricity generated. In the main grid, the total generation capacity of 164 MW (including the private HFO barge) consists of 50 MW hydropower, 30 MW biomass and 84 MW HFO units.

Is Sierra Leone struggling with electricity?

The period under study ranges from 2019 to 2040, with statistical data from 2015 included as the baseline year in the LEAP modeling. One of the main reasons for Sierra Leone's struggling electricity system is that little attention has been given to forecasting electricity demand and supply.
