Fmt group energy power Faroe Islands

What is the Faroe Islands' plan for becoming carbon neutral?

The Faroe Islands, like all other countries in this part of the world, are undergoing a green transition in energy production and energy use. Formally, the process began with a unanimous decision in the Faroese parliament in 2009, which committed the future governors to an energy policy that by 2020 would reduce total CO2-emissions by 20%

The Power Supply System

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

Energy

There is no shortage of renewable power in the Faroe Islands, due to the ocean currents and tides of the Northeast Atlantic and an abundance of strong wind. With an existing network of hydropower from mountain streams and lakes, converting other sources of natural power into affordable green energy is a top priority.
