

European Solar and Energy Storage Solutions

Freudenberg battery power systems llc Jordan

Overview

Does Freudenberg have a fuel cell system?

Freudenberg's fuel cell technology has also been a success in onshore applications. The company has partnered with Quantron, a specialist in commercial vehicle conversion, to develop a special system for heavy-duty 40-ton trucks.

Are Freudenberg batteries and fuel cells putting rail travel on the right track?

Freudenberg's batteries and fuel cells, or even a combination of the two, are also putting rail travel on the right track – particularly when it comes to non-electrified branch lines and shunting traffic. Freudenberg experts consider hybrid solutions, i.e. a combination of fuel cell and battery, ideal for heavy-duty and commercial vehicles.

How many high-performance batteries are in a Freudenberg ferry?

The roughly 1,200 high-performance batteries in each of the ferries will be equally divided between a total of four battery rooms and networked with each other. XALT Energy, a Freudenberg subsidiary company since December 2018 and headquartered in Midland, Michigan, USA, will be supplying the batteries.

Does Freudenberg have a long-term contract with Iges?

With well over 40 million miles driven, Freudenberg's battery systems are among the leading solutions on the market. The long-term contract with LGES underscores the strategic importance and growth potential that Freudenberg sees in its e-mobility solutions.

Will Freudenberg's methanol-powered fuel cell system be used on AIDAnova?

Freudenberg's methanol-powered maritime fuel cell system has also received "Approval in Principle" for its safety concept from DNV GL, the classification society. This is an important step towards its use on board. As early as 2021,

systems funded by the research project “Pa-X-ell2” will be installed on the cruise ship AIDAnova.
