Georgia domestic solar power systems

Overview

Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Is Georgia a solar-friendly state?

Georgia is one of the solar-friendliest states in the nation, with an average of 218 sunny days each year. This ample access to sunlight allows Georgia to make the most of solar energy production throughout the state. Georgia currently ranks 9th in the U.S. for solar energy production.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 11.89 kW solar panel system to cover their electricity needs, which comes out to \$31,693 before incentives. Prices range from \$26,939 to \$36,447, but after the federal tax credit, that drops by 30%.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

Do all solar facilities belong to Georgia Power?

Not all solar facilities you may come across belong to Georgia Power. We have constructed and are operating 16 solar farms and additional demo facilities

across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia.
