# Greatpower net Puerto Rico

## Overview

---

Why does Puerto Rico need electricity?

Every day we depend on electricity. We need it to run lights on the roads, produce goods and services, and keep the economy moving. Our job is to provide you with safe, strong, reliable electric service. The transformation of the electric grid, coupled with better services and rapid response, will allow us to live in a better Puerto Rico.

Will private power companies stabilize Puerto Rico's crumbling electric grid?

(AP Photo/Carlos Giusti, File) SAN JUAN, Puerto Rico (AP) — Two private power companies came under scrutiny Wednesday while they presented plans to stabilize Puerto Rico's crumbling electric grid as officials demanded immediate action to minimize chronic power outages.

Will a power station in Puerto Rico boost generation?

The company noted that a main power station in southern Puerto Rico is expected to come online this weekend, which would boost generation. Another one is expected to do the same in late October. However, the company noted that one unit has been out of service since 2016, when it was being run by Puerto Rico's power company.

How will genera PR reduce power outages in Puerto Rico?

Meanwhile, Genera PR pledged to reduce forced outages by half, as well as restore 800 megawatts of capacity by November following repairs. The company noted that a main power station in southern Puerto Rico is expected to come online this weekend, which would boost generation. Another one is expected to do the same in late October.

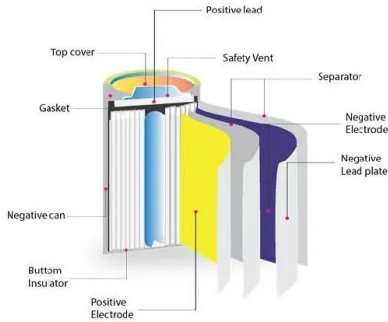

Why did Puerto Rico raze its electric system?

The bureau had ordered both companies in June to produce "aggressive" plans to improve the island's electric system, which was razed by Hurricane

Maria in 2017 but was already failing prior to the Category 4 storm given a lack of maintenance and investment under Puerto Rico's Electric Power Authority.

### What Would It Take to Bring Renewable, Reliable Power to Puerto Rico

With the island's year-round sunny weather, individual solar panels with storage allow people to generate their own electricity. And unlike California and Hawai'i, whose state governments have walked back incentives for rooftop solar, Puerto Rico is fighting to keep its net metering program.
