# Gree solar bracket installation process

## Overview

---

How do you install a solar panel bracket?

The end brackets will have a spot to hold a single panel, and the middle brackets will have a spot to secure two panels. Some solar panel kits may use single panel brackets. The basic is to position the bracket to capture the panel and then tighten the bolt that clamps the bracket to the panel.

How do solar panel brackets work?

Solar panel brackets are just a nut and bolt attachment. They come in a variety of styles, and each is slightly different. Many slide onto the solar frame railings and then tighten to hold the panel in place. The end brackets will have a spot to hold a single panel, and the middle brackets will have a spot to secure two panels.

How do I choose a solar panel mounting system?

Whether it's a flat commercial rooftop or a pitched residential roof, the material—be it metal, tile, or asphalt—will dictate the appropriate mounting system. Solar Panel Specifications: The size, weight, and configuration of the solar panels must be compatible with the mounting system to ensure a secure installation.

How do solar panels connect to a roof?

In short, the solar panels connect to a roof-mounted frame. The solar panels sit on the frame and are clamped with either a bolt, bracket, or other clamping devices. If you are using a kit, the clamps will match the frame making it easy to secure the panels to the roof.

How to install solar panels?

The basic system is to start with the installation of a rack or platform. If the panels are roof-mounted, a roof racking system is first installed. A ground platform is needed if the panels are ground-mounted, and installing the solar

panels is not difficult. What is more difficult is wiring them.

How do Trethewey & Warda install solar panels?

With the mounting system and electrical components in place, Trethewey and Warda install the solar panels. Each panel is bulky and heavy, so lifting them onto the roof is often a two-person job. Once each panel is in place, Trethewey and Warda connect it to the microinverter and fasten everything to the rails with clips and clamps.
