

European Solar and Energy Storage Solutions

Guernsey solar energy

Overview

What is Guernsey Electricity?

Guernsey Electricity was adopted as the trading name in 1993 and became Guernsey Electricity Ltd in 2001 following commercialisation. Guernsey Electricity is the electricity supplier in Guernsey. In 1998, the Channel Islands Electricity Grid was established to operate subsea cables supplying electricity from Europe, giving a secure, reliable and affordable source of energy.

What is Guernsey's energy policy 2020-2050?

The Energy Policy 2020-2050 established that the vast majority of Guernsey's energy supplies will come from clean, low carbon sources by 2050 at the latest, local renewable generation will be encouraged and residual emissions will be offset. In order to deliver this, the six following objectives were agreed:

Why is energy important in Guernsey?

Access to energy is a critical requirement which enables us to undertake daily activities such as using the internet, cooking, working, and staying warm. In Guernsey, we currently rely on fossil-fuel based systems of energy production and consumption and operate a thermal power station.

What is the energy transition in Guernsey?

In Guernsey, we currently rely on fossil-fuel based systems of energy production and consumption and operate a thermal power station. However, it is recognised that as part of the response to climate change, there is a need to transition to an energy mix with limited, if not zero carbon emissions. This is often referred to as the energy transition.

What does energy independence mean for Guernsey?

Greater energy independence - A system where a greater and significant proportion of our community's energy needs are supplied through local energy

sources. This will increase resilience by reducing exposure to external and geopolitical factors. The Committee for the Environment & Infrastructure is developing an Electricity Strategy for Guernsey.

Where is the Energy Centre located in Guernsey?

The Energy Centre is located at Admiral Park, St Peter Port, Guernsey Islands, GY1 3TB, Channel Islands.

Guernsey solar energy

Solar Photovoltaics

More commonly known as Solar PV, these panels are designed to produce clean, renewable electricity from the sun to power your home. It's also possible to sell the electricity your system generates to Guernsey Electricity to supply the island with even more renewable electricity. View the current 'Buy Back' tariff.

What Are Solar Photovoltaics?

"Solar Photovoltaic" is the formal name for these type of solar panels and are commonly abbreviated to "Solar PV" or just "PV". When electric power is generated, it goes directly into your home appliances and if you generate more than you use this gets automatically directed out to the cables in the road and used by the surrounding

Sunny side up: How is the solar energy revolution being funded?

Specifically, the British Energy Security Strategy has set out a target for the UK to deliver a five-fold increase in the deployment of solar by 2035. A Frontier Economics report released at the beginning of this year detailed how funds domiciled in Guernsey, like the ones that sit under the GGF regime, align with key UK policy objectives.

Energy Policy 2020 2050

o Guernsey, by extension of the UK's ratification of the Kyoto Protocol, is committed to reducing its greenhouse gas emissions. o The Energy Policy sets out a target of net zero by no later than 2050 in order to keep global temperature rise to below 2°C above pre-industrial levels.

Good Energy gets takeover approach from UAE-linked firm

The interest comes on the same day that Good Energy said it has agreed to buy Hampshire rooftop solar power firm Empower Energy for £7 million. The deal marks the fifth acquisition by Good Energy in the last two years, four of ...

Solar Photovoltaics
