

European Solar and Energy Storage Solutions

Guinea-Bissau types of solar panels for home

Overview

Can Guinea Bissau use solar energy?

Table 1: Solar insolation in a horizontal plan in Guinea Bissau With a yearly average of over 5.8 Kwh/m²/day (table 1), GB should be able to take advantage of all solar energy applications.

What is the most popular solar application in Guinea Bissau?

As of today, the most popular solar application is the rural individual photovoltaic system that has been exploited in Guinea Bissau for the producing electricity to power houses, schools, offices and hospitals or health centers. Solar water pumping is the second most installed solar application in GB (Ex. PRS I and II in Table 2).

What is wind energy used for in Guinea Bissau?

Wind energy is extracted from wind speeds by wind turbines. It was first used to produce mechanical power (windmills). Nowadays, it is mainly used for the production of electrical power . Unfortunately, none were counted in Guinea Bissau.

What is the main source of biomass energy in Guinea Bissau?

The most ancient and still the most used today in African countries, is the wood coal and patches for cooking. In Guinea Bissau, it is the main source of biomass energy but not the only one. GB has recently started trying new application of biomass energy.

What techniques are used to produce electricity in Guinea Bissau?

The main techniques used for the production of electricity are dams but there are also other techniques such as: Run-of-the-river hydroelectric, pumped-storage hydroelectricity, Tidal power and wave power¹. Guinea Bissau has an important site for the construction of a dam with a good potential for power generation.

Is Guinea Bissau a good place to build a dam?

Guinea Bissau has an important site for the construction of a dam with a good potential for power generation. The site is located in Saltinho and in 1983 a study done by “Consultores para Obras, Barragens e Planeamento, SA (COBA)” and financed by UNDP estimated that the dam could generate 18MW of electricity .
