Halo Solar , The Future of Solar

Energy

As 2025 approaches, the solar industry stands ready to embrace new opportunities, paving the way for a more sustainable, resilient, and interconnected energy future. Explore the trends driving the future of solar energy by reading the full article here.

South Sudan 1

'South Sudan receives very high levels of solar irradiation of 5.7 kWh/m²/day and a specific yield of 4.5 kWh/kWp/day indicating a very strong technical feasibility for solar in the country.⁶ Variable Renewable Electricity (VRE) plus-storage projects are in the planning phase in South Sudan including a 20 MW

A Bright Future for Renewable Energy in South Sudan

South Sudan faces significant poverty-related challenges, with more than 82% of the population living in multidimensional poverty. This includes limited access to basic services, such as clean water, health care, education and adequate nutrition. It is also, however, the least electrified. This situation has been exacerbated by ongoing conflicts, economic instability and ...

SunGate Solar - Village Help for South Sudan

SunGate Solar developed South Sudan's first solar mini-grid in the rural market town of Wanyjok. In parallel, Village Help for South Sudan conducted an electric cooking proof-of-concept project powered by the Wanyjok mini-grid.
