Have you signed a contract for installing photovoltaic panels

Overview

Usually, a solar photovoltaic (PV) installation comes with a proposal and a contract, so if you're thinking about going solar, it's important to understand what you'll be signing. Before you sign the contract, be sure you understand the terms—including what happens if a system component breaks or the manufacturer goes out of business .

Usually, a solar photovoltaic (PV) installation comes with a proposal and a contract, so if you're thinking about going solar, it's important to understand what you'll be signing. Before you sign the contract, be sure you understand the terms—including what happens if a system component breaks or the manufacturer goes out of business .

A solar contract is a signed agreement between a person and a solar power installation company that clearly outlines every part of the solar panel installation process, including the steps before, during, and after the actual installation, and who is responsible for each.

1. Contract and financing. Once you sign your contract, a team of professional installers and electricians design a solar power system for your home that maximizes performance and safety.

You could also sign a Power Purchase Agreement or a PPA, meaning you buy energy from your rooftop solar panels but you don't own the system. An investment company does. Head over to our Solar Financing Guide to find a detailed breakdown on how you can pay for your solar project .

an assessor near you. When you lease a solar energy system, a company installs the system on your house and you sign a contract to use the system. Contracts often last 20 years or more. You don't buy the system or own anything installed on your property. The leasing company owns the system and is generally responsible for system maintenance. What is a solar photovoltaic (PV) installation?

A solar photovoltaic (PV) installation comes with a proposal and a contract, so if you're thinking about going solar, it's important to understand what you'll

be signing.

What should I know before signing a solar energy contract?

Pay special attention to any language that connects you with the installation company, and outlines what you can expect the company to do for you. This guide is designed to provide a clear walkthrough of what you should know before signing a rooftop solar energy contract. What Is a Solar Power Contract?

.

What is a solar power contract?

A solar contract is a signed agreement between a person and a solar power installation company that clearly outlines every part of the solar panel installation process, including the steps before, during, and after the actual installation, and who is responsible for each.

What should a solar installation contract include?

Your solar installation contract should include crucial details about what happens and who is responsible for each, such as: Before your solar panel installation company can begin work on your roof, they have to get construction and/or electrical work permits from the city or county where you live.

Should homeowners pay for solar panels upfront?

Homeowners who pay for their panels upfront with cash, or through a solar loan, will see something different than someone who signs a solar lease or solar power purchase agreement (PPA). While solar contracts will differ by provider and project, most of them contain a certain amount of shared verbiage and content.

What happens if I don't sign a solar panel contract?

Waivers: You give up your right to claim something with a waiver. Check your contract to ensure there aren't any waivers you don't agree with. If there are, you should try to amend the contract before you sign, or refuse to sign the contract. **Termination:** This section outlines all the reasons you can legally terminate your solar panel contract.
