Heard and McDonald Islands wise energy solutions

Overview

Why are Heard Island and McDonald Islands isolated?

However, the site's isolation assists in reducing anthropogenic impacts upon the site's values. Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth.

Where are Heard Island and McDonald Islands?

Heard Island and McDonald Islands are summits of volcanoes that emerge above the Kerguelen Plateau. This plateau is the largest submarine plateau in the southern hemisphere, estimated to have formed 115 million years ago (Wallace et al., 2002).

Is there a threat to Heard Island and the McDonald Islands?

Ongoing and accelerating climate change poses an increasing risk of fundamental alterations in biodiversity. Geological processes (primarily volcanism and glacial retreat) continue undisturbed. The overall assessment is that there is a low threat to the World Heritage values of Heard Island and the McDonald Islands if visitation remains low.

Does Heard Island have high resolution bathymetry?

High resolution bathymetry of the seafloor around Heard Island has been updated in 2011 (Beaman & O'Brien, 2011) and 2023 (Beaman, 2023) to incorporate single beam data from fishing vessels and multi-beam data from research voyages, including from the 2016 and 2020 voyages by the RV Investigator (Coffin et al., 2020).

Heard and McDonald Islands , World Heritage Outlook

The Territory of Heard Island and McDonald Islands contains outstanding examples of active geological processes continuing in a largely undisturbed environment, free of local anthropogenic impacts. The physical processes provide an understanding of hotspot magmatism in an intraplate setting and of atmospheric and oceanic warming.

Heard and McDonald Islands McDonald Islands

Island and McDonald Islands group show unique evolutionary adaptations to the environment, and several other invertebrate groups provide opportunities to study evolutionary processes in undisturbed populations at the southern limits
