

European Solar and Energy Storage Solutions

Hexagon energy Mozambique

Overview

Who is hexagon energy?

Over the past 13 years, the principals of Hexagon Energy have developed and financed over 6,500 MW of energy, representing over \$1 billion USD in invested capital. We bring this experience and insight to every project. We pursue the best opportunities across all new energy technologies, building a diverse and balanced portfolio.

Why is hexagon energy planning early development projects?

Hexagon Energy is planning early development projects that capitalize on strong government incentives and unique geographic constraints. The world's oldest source of renewable energy, biomass power (or biopower) generation is expected to grow more than fivefold over the next 25 years.

How is hexagon transforming biopower?

Hexagon is exploring advances in technology that are creating new opportunities for biopower. Geothermal energy has the ability to provide consistent base load power with a small footprint. Because of this, geothermal power is forecasted to be one of the fastest growing sources over the next 25 years.

What is hexagon wind energy?

With roots in the wind industry dating back to 2002, the Hexagon team has developed over 6,000 megawatts of wind energy. Hexagon is targeting emerging technologies, sites, and approaches that can yield higher production at lower cost.

How does hexagon work?

Hexagon uses GIS analysis, in-house modeling, and historical experience to site and design projects that integrate with local and regional electrical grids.
