# Highland Solar Power Generation Project

## Overview

---

What is Highland BC solar project?

Highland BC Solar Project Limited Partnership, a subsidiary of Recurrent Energy, is developing the Highland Solar and Energy Storage Project (Project), an approximately 150 MW solar and up to 600 MWh energy storage facility in the Southern Interior Region of British Columbia. The Project will be located on approximately 395 hectares.

How many solar panels are there at Highland County Farm?

The Highland County farm is massive. It's roughly the equivalent size of 750 football fields. There will be more than 310,000 solar panels when the project finishes up this winter. That's nearly one solar panel for almost every Cincinnati resident.

What is the Roseland Solar project?

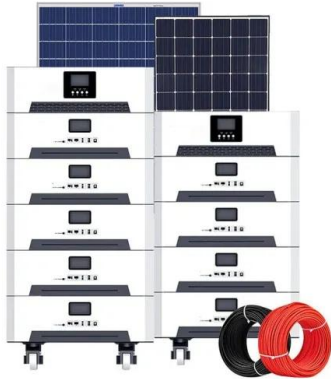

The 500 megawatt Roseland Solar project is one of the largest projects under construction in Texas. It will be combined with a 50 megawatt battery storage system. The hybrid power facility commenced construction on May 5, and is expected to achieve commercial operation in Q3 of 2022.

Where is the largest city-established solar array in the country?

HIGHLAND COUNTY, Ohio — Former farmland about 45 miles east of downtown Cincinnati will soon be home to the largest city-established solar array in the country. This winter, the city of Cincinnati expects to start receiving power generated by the New Market Solar field in Highland County, Ohio.
