Home Solar Power System Warranty

Overview

Before committing to a manufacturer, you should read all of the fine print and review these details:

- Solar panel performance warranty: Usually 25 years
- Solar panel product warranty: Typically 5 or 10 years
- Inverter warranty: Usually 5 years
- Installation warranty: Typically 1 or 2 years, but up to 10 years in some cases.

Before committing to a manufacturer, you should read all of the fine print and review these details:

- Solar panel performance warranty: Usually 25 years
- Solar panel product warranty: Typically 5 or 10 years
- Inverter warranty: Usually 5 years
- Installation warranty: Typically 1 or 2 years, but up to 10 years in some cases.

Solar panels and microinverters are typically covered under the product warranty for up to 25 years. Central inverters are typically covered for up to 10 years.

Several types of warranties are available for residential solar panels, including manufacturer's warranty, performance warranty, workmanship warranty, installation warranty, and inverter warranty.

Solar panels generally come with two warranties: The product warranty covers the equipment and typically guarantees at least 10-12 years without fail, and the power or performance warranty often gu.

Power Warranty Solar panel manufacturers specify a maximum degradation rate, and the power warranty covers you if they deteriorate faster. For example, if your manufacturer specifies a performance loss of 0.50% per year, and your solar panels start to lose 1% of their productivity per year, the performance guarantee comes into effect, and you get a replacement. How long is a solar panel warranty?

Solar panel warranties vary depending on the manufacturer, but in the solar industry, a 10-year product warranty and a 25-year performance warranty are typically considered the minimum standard. However, some manufacturers provide a 25-year product warranty and extend the performance warranty to

30 years. How Much Does a Solar Panel Warranty Cost?

.

What is a performance warranty on a solar panel?

A performance warranty guarantees a maximum level of degradation – typically between .25% and .75% – per year so that in 25 years the panel will still have 80-90% of the power output it did in its first year. Performance warranties are important for sizing solar systems to maintain 100% offset for 25 years.

Are solar panels covered by warranty?

Sometimes * Shipping of new panel covered by some other home solar company warranties, but often not for return and testing of defective panel. Panel warranty term * 25-year coverage for all core components on the roof: solar panels, microinverters and racking system. 10-year product warranty term for monitoring hardware.

What is a residential solar company warranty?

Other residential solar company warranties cover one component of the entire system, leaving you with up to 4 separate warranties (panel, inverter, racking, monitoring). With other residential solar companies: SunPower stands behind your entire system, not just the panels. We also:

What is a solar energy power output warranty?

Solar energy power output warranties help guarantee that your panels won't rapidly lose efficiency, which would lead to lower and lower energy savings over time. The typical solar array pays for itself in around 11 years and provides energy savings of more than \$31,513 over the following 14 years of expected panel life.

What are the different types of solar warranty?

There are two main types of solar warranties: performance warranty and product warranty. A performance warranty is a guarantee that the total system output will not drop below a specified degradation percentage. A product warranty guarantees the solar panel's capability to produce energy, and it's also known as a lifespan warranty.
