Overview

Does solar illumination offer a solar home lighting system?

Solar Illuminations offers solar home lighting systems. They have a large selection of three different base systems, and many different types and designs of lights to be used with the system. Solar Illuminations is a great option for off-grid homes, cabins, or other buildings.

What is a solar lighting system?

This solar lighting system is generally used for energy savings, cost savings, and environmental reasons. These systems are called grid-free or stand-alone, meaning that they generate their own electricity at that specific site. No power is used from the grid, and no moving parts to worry about breaking.

How do I choose a solar lighting system?

Contact your lighting representative for your project costs and information. Next time you are looking to light up an area and need a solar option, consult your solar lighting specialist to help you design the perfect system tailored to your specific needs. From big to small, solar LED lighting can be a great choice.

Are off-grid solar lighting systems a good choice?

If you are trying to provide light to an outdoor space at night, then off-grid solar lighting systems would be the best option. Within off-grid solar lighting systems, there are many variations that we will cover.

What is grid-interactive solar lighting?

The third technology gaining momentum in solar lighting is grid-interactive, sometimes referred to as hybrid systems. These systems have three meanings within their meaning. One type of hybrid system is a system that generally only has solar modules and no battery.

What is solar lighting & how does it work?

The second and most common way we at SEPCO refer to solar lighting is an off-grid solar lighting system. These systems feature a photovoltaic (PV) module or array that collects energy from the sun and stores it in batteries to operate the required wattage of light at night.
