The cost of insuring your solar panels can vary. We're talking anywhere from \$200 to \$600 per year, depending on factors like your location, the size of your system, and the coverage you choose. How much does insurance cover a solar panel system?

Your insurance policy's coverage limit is the maximum amount it will pay for a covered loss. In 2021, the cost of an average 6-kilowatt solar panel system was \$16,860 before tax incentives and rebates; many homeowners will install systems sized at 10 kW or greater, meaning that solar is an investment worth tens of thousands of dollars.

What is solar panel insurance?

Solar panel insurance is a type of coverage that protects homeowners who have installed solar panels on their property. This coverage is typically included in most homeowners insurance policies, which means that no separate solar panel insurance is needed.

How much does a solar panel cost?

The average residential home can have a solar energy system installed for around \$25,000 (compared to \$40,000 back in 2010). Even with these drastic cost reductions, a solar panel system is a major investment and will affect your insurance premium. Do I need a separate policy or endorsement for solar panels?

.

Do you need insurance for solar panels?

When it comes to adding solar panels — otherwise known as photovoltaic (PV) systems — to your roof, most insurance companies see them as part of the structure of your home. That's good news because it means a regular homeowners policy usually has you covered, and you won't need to get special insurance just for your solar panels.

Will solar panels increase my home insurance?

Many insurance providers offer discounts on home insurance costs if you make the house more eco-friendly. Adding solar panels to power your home definitely fits the bill. The only way to know if the price of your homeowner's insurance will increase due to the solar panels is to speak with your insurance agent.
