On the roof, lay out the locations of the stanchions that will support the solar panels. Screw each stanchion through the roof and into a roof rafter. Also, be sure the stanchion flashing fits beneath the roof shingles to prevent leaks. Fasten the upper and lower aluminum rails to the stanchions with stainless steel bolts. Tighten the bolts with an impact driver. Measure diagonally across from the end of the upper rail to the end of the lower rail. Repeat to measure the opposite diagonal distance. Now install the middle rail, aligning it with the upper and lower rail. Run electrical conduit and wiring up to each array of solar panels.
