How to install photovoltaic panels on factory sheds

Features and applications
17 kWh of usable energy

100% recyclable

Overview

Run connecting wires throughout the shed. The wire allows you to distribute power throughout the shed. Install the solar panel array. For a permanent installation on a shed roof, rigid solar panels are likely your best bet. Set up the portable power station or balance of system components. Install Connector. Plug into Solar Generator. .

Run connecting wires throughout the shed. The wire allows you to distribute power throughout the shed. Install the solar panel array. For a permanent installation on a shed roof, rigid solar panels are likely your best bet. Set up the portable power station or balance of system components. Install Connector. Plug into Solar Generator. .

Step 1: Set up the shed for the installation Build a sturdy support wall within the shed to attach and organise the solar components. Create a well-ventilated box on the shed floor to house the batteries. This will ensure proper airflow for heat dissipation. Mount the fuse box and charge controller on the support wall, then connect them. Install the inverter on the support wall.
